

# Assisted Living

Residents carry on their vital and engaging lifestyle—yet they enjoy a safe and secure environment with richer support for daily activities such as bathing, dressing, medication management, mobility and more. Experienced and professional associates help, while retaining your dignity and independence. Plus, our communities excel at providing an excellent active and social environment where seniors can meet and mingle with others in the same stage of life.

You'll live comfortably and enjoy your daily routine, all while benefitting from housekeeping and nutritious meals, attention to hygiene and healthcare—an escape from the daily burdens of life, without the stress of regular chores or household tasks.

When you might consider Assisted Living:

- Daily tasks of living are a challenge. Mobility issues may be common. Access to medical care may be a chore. Are you isolated and lacking social engagement? Missing a connection with individuals at a similar life stage? Our professionals make the transition easier.
- Ready to give up the stress. The daily to-do list can be a thing of the past. Remove the burden, retain the freedom to focus on the enjoyment of life—activities with friends, entertainment, nutritious food and common experiences with fellow residents.
- Transportation is a challenge. We have scheduled transportation to nearby shopping and dining options—plus trips to medical appointments as needed. Still driving? Not a problem at most of our communities. Keep your car.
- You're ready for help—but you're still active. Our residents bring personal belongings and furnish their new space like their home. You'll feel comfortable and at ease in one, two or three bedroom accommodations with your partner.

## Have questions?

Contact us—we're happy to help, provide a tour, and give you a glimpse into the Assisted Living experience. You may not know what level of care you need—and that's why we're here. Let us help with an assessment.

# Memory Care

Our Memory Care communities are carefully designed to meet your needs and those of our residents. Each resident is defined by their individuality and entitled to a life of meaning, wellness and vitality—regardless of their diagnosis. We provide a safe environment for activities such as gardening, kitchen work, and other projects that use meaningful life skills and individual talents.

Maybe the journey began with increasingly common memory lapses or a series of more serious “senior moments.” But Alzheimer’s and dementia are serious conditions with far-reaching effects on the resident and all their loved ones. The next steps are fraught with questions and emotions.

You are not alone. We are here to support you through the emotional whirlwind—and provide you the space and the comfort to take care of yourself without guilt. A diagnosis involving brain disease can be a blow, but Pegasus professionals know that the dignity and support for the patient and their family are paramount.

The Dining Experience—Our expert culinary team members and registered dietitians provide a unique dining experience that sustains the resident’s enjoyment and mastery of dining. Memory-friendly menus provide diverse food offerings that are both nutritious and help to prevent weight-loss. Selections are easy to manage, familiar and appealing to the senses. Personalized dining assistance evaluates each resident’s need for prompting of utensil assistance, with a focus on preserving a resident’s utensil use for as long as possible. Supportive dining environments incorporate small dining rooms with consistent seating to support the challenges of those with memory loss. This

encourages familiarity and socialization, and assigns resident care assistants to support the individual needs of the residents. The dining experience is enhanced with music, colorful centerpieces and fresh table linens.

You may have been caring for a loved one’s decline into dementia for some time. As a caregiver, you may be drained and exhausted. Don’t drive yourself to the point where you have nothing left to give. Look for support, guidance and an opportunity to recharge and gain perspective.

Providing exceptional Memory Care is a complex task that requires ongoing guidance and instruction for our associates. We focus on proper techniques and interactive care of persons with memory loss. Established protocols enable associates to intervene when challenging behaviors resulting from memory loss arise. This holistic-community philosophy is the key that empowers all associates to identify the resident’s unmet needs and provide an appropriate solution.
